

I'm not robot

The recommended engine oil capacity for 4-stroke Yamaha outboards varies depending on the model and horsepower. The manufacturer provides guidelines for each class: Portable (2.5-25 HP), Midrange (30-115 HP), and High-Performance (150-450 HP). Here's a breakdown of the oil capacities for specific models: * F2.5 (2.5 HP): 0.37 US quarts * 4-6 HP portable: 0.63 US quarts * 8-9.9 HP: 0.85 US quarts * 15 HP: 1.69/1.9 US quarts * 20-25 HP (standard): 1.2/1.0 US quarts, or 1.69/1.48 for certain models * 30-40 HP: 1.59/3.0 US quarts * 50-70 HP: 2.22/2.01 US quarts * 75-115 HP: 3.38/3.17 US quarts * 150-200 HP (4-cylinder): 4.76/4.55 US quarts, except for certain models that take 7.08/6.76 quarts or 4.97/4.76 quarts * 225-300 HP: [no specific information provided] Note that some models may have slightly different oil capacities depending on whether the filter is replaced or not. **Yamaha Outboard Engine Oil Capacities** The oil capacity varies by engine type and size. Here are some general guidelines: * V6 engines (200 HP, 350 HP, and 425-450 HP) have capacities ranging from 6.3 to 8.5 US quarts. * The high-performance V6 engine takes around 7-8 US quarts of oil with a filter and 6-7 US quarts without one. * 350 HP Yamaha outboards use 6.87 US quarts (with a filter) or 6.66 US quarts (without a filter). * The most powerful V8 engine used in 425-450 HP models takes 8.24 US quarts with a filter and 7.93 US quarts without one. **Yamaha Outboard Engine Oil Chart** Here's a chart summarizing the oil capacities for various Yamaha outboard models: | Model | Oil w/o Filter (US qt) | Oil w/ Filter (US qt) | Displacement (Liter) | | --- | --- | --- | --- | | F2.5 | 0.37-0.07 | 0.85-0.21 | 3.4 | | LF40 | 0.63-0.14 | 1.20 | 4.7 | | ... | ... | ... | ... | **Yamaha Outboard Gear Oil Chart** The recommended gear oil for Yamaha outboards is Yamalube Marine Gearcase Lube or Hypoid gear oil (SAE 90 API GL-4). Here's a chart summarizing the gear oil capacities: | Model | Gear Oil Quantity (US qt) | | --- | --- | | F2.5 | 0.08 | | ... | ... | **Oil Change Intervals** The general rule is to change the engine oil every 50-100 hours or at least once a year. If your motor is new, you should change the oil after the first 20 hours of operation. **Takeaways** * The oil capacity varies by engine type and size. * The smallest single and twin engines (2.5-25 HP) hold only 0.37-1.7 quarts of oil. * Midrange models with 30-115 HP engines require 1.8-3.4 quarts of oil, while high-performance models take 4.8-8.5 quarts. Note: The above paraphrased text is a condensed version of the original text and should not be used as a substitute for consulting the official factory manuals or the owner's manual for specific information on your Yamaha outboard engine's oil capacity and maintenance requirements. To refer to your owner's handbook.
