Due to further updates, due to the VMO anti-piracy system, the root could not work correctly with custom ROMs, this project was stopped. I spent a day fixing the root, but without success. Ruth is simply broken or as if disabled. I recommend using the modified VMOS Pro APK instead, it's much easier to use. Don't trust the antivirus if the mod detected as Virus VMOS Pro was protected so I couldn't modify the APK. Instead, I created my own ROM as a VMOS Pro zip file that includes Superuser and Xposed. If you're wondering why the VMOS team released the Pro version, they were denied the opportunity to make money from ads, so they could only make money from the VIP service. If you support them, consider paying VIP per month to keep them and you can use their official ROM with "Switch Root" instead. You cannot install other ROMs such as Samsung, Huawei, etc. VMOS ROM installation is for VMOS ROM only. Please don't be stupid, thanks! Download English and Chinese versions of VMOS combined into one APK, so you will get the same version when you download from EN or CN site. Global (En) Site: Custom ROM download: The following ROMs are available. All firmwares are tested before release: - Android 7.1.2 ARM64/64 bit (Root, Xposed and Gapps) - Android 7.1.2 ARMv7/32 bit (Root, Xposed and Gapps) - Android 5.1.1 ARMv7/32 bit (Root, Xposed and GAPPS) - Android 4.4.4 Armv7/32 bit (Root, Xposed and Gapps added) (PlayStore is currently down. Don't know why) Want other versions of 'Android'? Please apply Substantiated ROM: ☛ ce Roms If you are using the VMOS-CN program, other users special ROM that can be downloaded from the community department: nothing yet. Some modifications previously modified to Rome have deleted files from the Internet setup: VMOS SD card has not been accessed, make sure you save the files in internal memory rather than on the real SD card. Download files are usually saved in storage/emulator/0/Download directory. Very important: Make sure the massif and the filename does not have a gap and special characters, otherwise ROM will not be installed! Open VMO Pro, give all permits for the first time. Click the plus sign 3 of 3 options, VM Rec, move local rom and download remote Roma. Get a virtual machine to install your Rome, supported or anything. Apparently someone uploaded Rome to YouTube download Rome directly from the distant url. I tried it with my server and I will not install it later in Rome. At the moment, I have no connection, import local Roma and import downloaded and installed Roma. This is the best way to install a personal rom and go to a place where Rome files are stored, and after this good run it is uploaded and opened! Note: If you are not yet open in Settings without VIP and you can close Root and you can't do XPose, first read the SSS. I can advise you to contact VMO creators, not to change anything simply because I am Rome. Motorola et al. Others such as Samsung, Huawei and others. Dedicated to VMOS. Rom installation applies only to VMOS-ROM. Don't be specific, thank you! Q: Can you add Roma Supersu or Magisk? Many times I tried to add Supersu or Magisk but failed. I think there is a scenario that can determine the VMOS MAGISKS restriction, but it does not work properly play store collabies and does not open for 1-5 minutes until updated: mine Google account after registration is not added: sometimes if you register directly Google games. Go to "Settings" -> "Accounts" -> "Add accounts". Q: The Play Market has no application. A: Erase the data from merchants and google services and restart Vmosq; Can you flash your ROM with the subsequent versions of Android? A: The Rom and the nucleus are closed sources, so it may not be possible at the moment. I am not a Roma developer, please ask the developer VMMS the best answer. Q: I am not even provided with Root; This is a VMOS super user problem. Ask the developer VMO to repair it. Q: Is it possible to add Android 8, 9, 10 or 11? A: No, I'm not a VMOS developer. Contact the VMOS team for more information. Read more answers to the questions frequently asked on the official VMOS website.
