Objective

Extensive working experience on all phases of Software Development Life Cycle (SDLC), its methodologies and processes like Waterfall and Agile/Scrum; as well as Manual and Automated Software Testing processes.

Skills

SQL, Quality Assurance, Testing, QTP and UFT.

Work Experience**QA Automation Engineer/Consultant**

Target Corporation - September 2013 - 2019

- Analyzed business requirements and functional documents; created the test strategy document that define the test environment, phases of testing, entrance and exit criteria into different phases of testing and resources required to conduct the effort.
- Involved in writing Test Cases by using Wireframe, Design documents and Acceptance criteria.
- Drafted Test Plan which included testing objectives, testing phases, scenarios and test environment after a thorough analysis of the business rules.
- Created Testingframework using SeleniumWebDriver to automate the Web Client.
- Introduced and Implemented open source web test tool SeleniumWebDriver for cross browser testing.
- Converted commercial QTP Scripts to open source SeleniumWebDriver scripts to maximize the profits of the company without compromising Quality.
- Committed Selenium WebDriver scripts to Git using EGit plugin for Eclipse IDE.

QA Automation Engineer

ABC Corporation - July 2012 - August 2013

- Responsibilities Analyzed Functional Baseline Documents (FBD) and Iteration Target Documents; participated in walkthrough meeting and requirement review meetings with business team; created the test plan and test scenarios for the GUI Testing and functional testing.
- Conducted Smoke Testing, User Interface Testing (GUI Testing) and Performance testing at the beginning of every build to test the compatibility of the application with the Platform, Browser and User Load.
- Performed Regression Testing at each and every application deployment and reported the bug matrices to be fixed.
- Used MS Excel, MS Word, Notepad and the Open Source TestLink for developing test cases, reporting the issues and tracking the progress through Test Management System.
- Reported the software issues in the form of Bug, Question, Documentation or Future Feature.
- Coordinated with the business team and the development team for clarifying the business requirements.
- Implemented the open source Selenium as an automation testing tool.

Resume templates for automation engineer.

Background in quality assurance and lean manufacturing with focus on meeting quality goals and customer service. Write about your work experienceIn the experience section, list the previous organizations you worked for that are relevant to this job. Give numbers, statistics and percentages with your accomplishments to show how you benefited the company. Education is usually the last required section on an automation engineer resume, but you can add sections such as awards and hobbies and interests if they contribute to the job and can help you stand out among other candidates.Automation engineer resume templateHere is an example of a template you can follow when writing an automation engineer resume:[Your full name][Address, email and phone number(s)][Professional summary][Introduce yourself, describe your qualifications and add content that shows you are the best candidate for the position.][Work experience][Your job title and dates of employment][The name of the employer and the city and state][List your responsibilities and accomplishments in each position][Skills][List all your skills related to the position][Education][State your degree and the date you received it.][School name and location][Hobbies and personal interests][Briefly describe your personal interests in one paragraph or a bulleted list.][Awards][Name each award and the year received]Automation engineer resume exampleUse the following automation engineering resume to inspire your own resume:**John Peters**+464-227-6000[johnemall@gmail.com]Professional summaryFocused engineer with over seven years of experience in diverse production and manufacturing environments. Write a headerinclude your contact information in the header at the top of your resume. The information in this section should explain in a couple of sentences why the employer should hire you, how the position matches your career goals and what skills and experience make you the best candidate.Related: Tips for Writing an Engineering Resume Objective (With Examples)3. In this article, we review what an automation engineer resume is, what to include in it and how to write it and show an example of an automation engineer resume.What is an automation engineer resume?An automation engineer resume is a summary of an individual's experience, skills and qualifications for an automation engineering job. You should include content that convinces the employer to choose you over other automation engineer candidates. Familiarize yourself with the job description before writing your resume, noting the keywords used and qualifications required. Include your complete address if you are applying to a local job, but omit it if you are applying out of state.2. Include a resume objective or professional summaryThis optional but important section provides a brief description of your strengths and goals. Highlights of qualifications:Outstanding experience in automation engineering, WMS, ERP and .NET.Operational knowledge of HMI programming, PLC and design engineeringFamiliarity with field I/O devices and automation GUI ToolsSuperior communication and leadership skillsProfessional experienceAutomation engineer, 2019 - currentGCTH Co., Orlando, FloridaOverseeing daily operations and quality system implementationWriting operation requirements and quality assuranceDrafting working drawings, wiring connection specification and wiring diagrams as required to instruct the installation crewManaging many projects within budgetary restrictions simultaneouslyDeveloping, organizing and maintaining records and reports to increase efficiencyDesigning library of highly sustainable and quickly installable modulesAiding engineers and the quality assurance team with code and design reviewsResolving all automation related problemsAutomation engineer, 2013-2018FLAT NET Co., Orlando, FloridaAnalyzed requirement documentsDeveloped test plans, strategies and scenarios basing on application requirementsPerformed manual functional testingUsed JIRA to report web application defectsResponsible for core regression, user acceptance testing, integration testing using Java and Selenium WebDriverUsed GitHub for controlling code versionUsed JAVA OOP concept to follow page object modelAutomated over 60 Gherkin ScriptsUsed Jira issue tracking system to respond to and resolve bug-tracking ticketsMaintained and configured Jenkins to apply the CI process and integrated the tool with Ant and Maven to schedule buildsCreated necessary components to run framework only on pages that incorporated our company's specific GUI widgetsDid Cross browser testing in Firefox, Chrome and Safari using SeleniumMet daily agile scrum standup to discuss project progressAutomation engineer, 2010-2012Ice Tech., Sarasota, FloridaGathered requirements and specifications from development staff prior to testingCreated test scripts to automate testingReviewed manual testing methods and developed automated scriptsDeveloped SQL procedures and queries to test the databaseWrote data-driven tests that handled scenarios requiring multiple datasetsInterpreted and analyzed test data

and prepared technical reportsCollaborated with QA testers and end users to determine necessary requirementsPerformed problem solving for customer quality and technical quality issuesUsed Win Runner to design test scriptsPerformed integration testing of all functionalities and featuresSkillsConfiguration managementDevelopment methodJavaC++PCBTeamworkData managementLeadershipCommunicationEducationMaster's degree in automation engineering, 2006-2009Texas A&M University, College Station, TexasBachelor's degree in mechanical engineering, 2002-2006Texas A&M University, College Station, TexasPlease note that none of the companies mentioned in this article are affiliated with Indeed. By Indeed Editorial TeamApril 29, 2021When applying for automation engineer jobs, your resume is key to impressing hiring managers and getting an interview. List six to 12 skills in bulleted list form, and be honest about what you write. For each one, include your job title, years of employment, duties you performed and achievements. Follow these steps to write an automation engineer resume that improves your chances of getting an interview:1. It is usually the first section hiring managers read and is your opportunity to immediately make a good impression. It contains all the information an employer needs to know about a candidate and how to contact them.Related: What Is an Automation Engineer? For example, state the percentage increase in profits or savings you made in a certain year.5. Include your educationList each degree you have earned, starting with the most recent or advanced, followed by the name of the school, your graduation date and any relevant certificates or honors you received. Include the following information:A header with your name, address, phone number and emailAll your education qualifications, from the most recent to the earliestYour most relevant soft and hard skillsAll the organizations you have worked for previously, including your dates of employment, the location and three to six bullet points explaining your duties and accomplishments with eachOther relevant sections, such as hobbies and interests and publicationsProofread your resume closely before sending it to hiring managers to make sure the information is clear and the spelling, punctuation and grammar are correct.Related: Here's Everything You Should Include on a ResumeHow to write an automation engineer resumeYour automation engineer resume should match the description of the job you are applying for. A resume provides an employer with clear information about who you are and your abilities and achievements. It should list your name, address, phone number and email. Automation engineer skills might include data management, teamwork, human-machine interface skills, test scripts and Python, PLC and Java proficiency.Related: 12 Essential Engineering Skills for Your Resume4. List your most important skillsIn this section, include only your strongest and most relevant skills, as stated in the job description. Use a larger font than the rest of the resume for your name. Skills and CertificationsWhat to include in an automation engineer resumeThe information in your automation engineer resume should emphasize your technical skills, experience and career objectives. Review the job description before writing to identify the most relevant information and keywords you should include in your resume. It should be visible and easily readable, so the employer can identify you within a few seconds.
