Now available for pre-order on the Hasbro Pulse website, the Japanese Spider-Man – sometimes referred to as "Supaidaman" -- measures six inches and comes with multiple accessories, including swappable hands, webs and his trademark Spider Bracelet. The figure also boasts several points of articulation perfect for recreating Spidey's wild arachnid poses -- a common sight in the television show, where the character frequently struck a dynamic stance while announcing himself as "the Emissary of Hell, Spider-Man!" The figure was unveiled as part of Hasbro's latest Marvel Legends collection, which also includes a figure of War Machine based on the '90s Iron Man cartoon series, a four-pack of Mojoworld-inspired figures and a sculpt of Sharon Carter inspired by The Falcon and the Winter Soldier. Created by Toei as part of a licensing agreement with Marvel, the Japanese version of Spidey is a motorcycle racer named Takuya Yamashiro whose powers were gifted to him by an alien arachnid from Planet Spider. Using the incredible abilities of his Spider Bracelet -- a tool that could shoot silky webs, store his red and blue outfit, and even summon a ship named Marveller which transformed into a giant mech named Leopardon -- "Supaidaman" frequently found himself at odds with the evil Professor Monster and the Iron Cross Army. The Japanese Spider-Man series ran for one season from 1978 to 1979 and encompassed 41 episodes. Stan Lee was a noted fan of the series, pointing out that it resembled a real-life comic book. Despite this high praise, the show's unique interpretation of Spidey languished in obscurity outside of Japan for years, even though its giant robots and colorful fights served as a forefather of sorts for Toei's many other live-action television tokusatsu series, including Kamen Rider and the Super Sentai franchise, localized internationally as Power Rangers. Toei's take on the Spider-Man mythos finally achieved international notoriety after Supaidaman appeared in the 2015 comic crossover arc "Spider-Verse," spearheaded by writer Dan Slott. Supaidaman would appear again in the 2018 event "Spider-Geddon." In 2020, the Disney+ documentary Marvel's 616 highlighted the series in one episode. Most recently, the Japanese Spider-Man received his own Funko! Pop and is set to appear in 2023's Spider-Man: Into the Spider-Verse sequel. The character has canonically been classified into Marvel's multiverse, existing on Earth-51778. Hasbro's Supaidaman figure can be pre-ordered for \$27.99 and becomes available for shipping on Jan. 1. Source: Hasbro Pulse
