Little is known of the language's prehistory, or when it first appeared in Japan. Chinese documents from the 3rd century AD recorded a few Japanese words, but substantial texts did not appear until the 8th century. During the Heian period (7941185) in Japan, the Chinese language had considerable influence on the vocabulary and phonology of Old Japanese. Late Middle Japanese (11851600) included changes in features that brought it closer to the modern language, and the first appearance of European loanwords. The standard dialect moved from the Kansai region in the south, up to the Edo region (modern Tokyo) in the Early Modern Japanese period (early 17th centurymid 19th century). Following the end of Japan's self-imposed isolation in 1853, the flow of loanwords from European languages increased significantly. For common English names, a dictionary lookup of about 4,000 English names is used. For other names, a learned substitution model trained on these names is applied instead. This method is very similar to the Transformation-Based Learner (TBL) invented by Eric Brill. Essentially, given a list of English/Japanese name pairs, the system learns a series of substitution rules to apply to the English input in order to get the Japanese output. For instance, the first rule the system learns is to replace the letter "L" with the letter "R", because there is no "L" in Japanese. Later on, more subtle rules are applied, such as "replace G with J if it's followed by an E." Here is the full list of rules. Congratulations, you took high-school Japanese. This web site was not designed for you. The machine learning method sometimes makes mistakes. In my own tests, it had an accuracy of about 95% on a per-character basis, but your mileage may vary. In my defense, transliteration is not an easy task, especially with a language as orthographically challenged as English. The vowel system is very irregular, and some names are even ambiguous. For instance, is Jaime pronounced /'jem-i/ (JAY-mee) or /'hame/ (HIGH-may)? In any case, always check with a Japanese friend before getting any badass tattoos based on this web site.
