Codehs super karel answers

```

}

// Returns the text in all lowercase letters
// find a method in the javadocs that
// will allow you to do this with just
// one method call
public String whisper()
{
    return text.toLowerCase();
}

// Reset the instance variable to the new text
public void setText(String newText)
{
    text = newText;
}

// Returns a String representatin of this object
// The returned String should look like
// I say, "text"
// The quotes should appear in the String
// text should be the value of the instance variable
public String toString()
{
    return "I say, " + "\"" + text + "\"";
}
    
```

Codehs 2.1.4 super cleanup karel answers.

FunctionAllows us to break down our program into smaller parts, and makes the program easier to understand.Rules for defining a function*Name should start with a letter, and cannot have any spaces*The name should describe what this function does*The code in the function goes between the { and the } character, and this is called the "function body."*Start functionAll of our programs start withWe use functions to*Break down our program into smaller parts*Avoid repeated code*Make our program more readableCommentsNotes that you leave in your code so others can know what your code is doingFor loopsRepeats a section of code a fixed number of timesConditions is a function that returns a true/false answerif statements programming conditional statement that, if proved true, performs a function or displays information.if-else statementsit executes a block of code if is true. The interactive display makes it all fun and entertaining to use the platform while giving a wide range of modern techniques and tools to transform your hunger into professional success. The seamless integration of all the major programming languages and other modules in one place makes CodeHS the finest medium for online learning for every aspirant. This is determined by the type of network and the software used to transmit data.PacketsSmall chunks of information that have been carefully formed from larger chunks of information.CybersecurityThe protection of computer systems, networks, and data from digital attacks.CIA TriadConfidentiality, Integrity, AvailabilityConfidentialityThe protection of information from people who are not authorized to view it.IntegrityAims at ensuring that information is protected from unauthorized or unintentional alteration.AvailabilityThe assurance that systems and data are accessible by authorized users when and where needed.Digital FootprintAll of the information about a person can be found online due to their activity.CyberbullyingThe use of electronic communication to bully a person, typically by sending messages of an intimidating or threatening nature.PrivacyThe appropriate use of your data.CopyrightA form of protection for intellectual property, usually applying to artistic work.Hackera person who uses computers to gain unauthorized access to data on the internet.White hat hackersethical hackers that break into the systems for non-malicious reasons such as to test the system security vulnerabilities or to expose undisclosed weaknessesBlack hat hackersbreak into other people's computer systems and may just look around or may steal and destroy informationGrey hat hackersA cross between black and white—they will often illegally break into systems merely to flaunt their expertise to the administrator of the system they penetrated or to attempt to sell their services in repairing security breaches.CryptographyThe study and use of techniques for securing communication.EncryptScrambleDecryptUnscrambleCryptanalysisThe process of decrypting a message without knowing the cipher or key used to encrypt it.CryptologyThe study of solving and writing encryptions.Symmetric Encryptionthe same key is used to encode and decodeAsymmetric Encryptiontwo keys are used; one key encodes the message, and the other key decodes the messageHashingChanging a message into an unreadable string of numbers.CodeHS All Lesson Answer Keys [Watch Video]About CodeHSPowered by passion and inspired by innovation, CodeHS is a digital platform designed with an intention to deliver well-versed and in-depth knowledge of coding. From learning to advancing your skills and talent, CodeHS is your one-stop solution that answers your every problem.Visit ClassroomStruggle Homepage for other related course answers.Hope you all find the right CodeHS answers and once again please do share with your friends if it helped you in any way. They intend to bridge the gap between teachers and students by providing limitless learning opportunities and possibilities around the world.When it comes to exploring avenues in the field of computer sciences, they took a unique approach to empower students, teachers, and society with professional skills that transcend cultural boundaries. If it's false, another block of code can be executed.While loopsallows us to repeat a section of code as long as some condition is true.Computeris a computing machine that performs calculations according to precise instructions.Uses for computers*To keep counts*Marketplace*Calculate astronomical positions*Solves math problems*Military and business useHardwarePhysical componentsSoftwarePrograms that run on the computerSystem softwarePrograms that run on the computer that helps the computer perform tasks.BinaryIs a number system with only 0's and 1's.ByteUnit of digital data.Digital InformationInformation stored as numerical digits.Data AbstractionThe process of simplifying complicated data into manageable chunks.Decimal Number SystemA system with 10 numeric values, 0 through 9.ASCIIAmerican Standard Code for Information Interchange.PixelsThe building blocks of digital images.Hexadecimal Number Systema base-16 system, consisting of the 16 symbols 0 through 9 and A through F.RGB Color Schemeallows us to encode colors as numeric data.R = Math.min (R + 50, 255);G = Math.min (G + 50, 255);B = Math.min (B + 50, 255);Brightness FilterR = Math.max (R - 50, 0);G = Math.max (G - 50, 0);B = Math.max (B - 50, 0);Darkness FilterInternetA global network connecting millions of computers, making it possible to exchange information.NetworksA group of 2 or more computer systems linked together.BandwidthThe capacity of data transfer in a system and it's measured by bitrate.LatencyThe time it takes for a bit to travel from its sender to its receiver.The Internet ProtocolA protocol that defines the layout of an Internet address.DNSThe service that translates URLs to IP addresses.Routingthe process of deciding which path to take on a network. A perfect blend of excellence and brilliance.The ambition to offer everyone the same basic principles, curriculum, and learning environment about computer knowledge is reaping fruits through growth, potential, and talent.
