This is especially useful for café, restaurant and bar use as, although the effect isn't complete waterproofing, it does help protect them against splashes and means they can be wiped down with a slightly damp cloth if they get dirty. Gloss ramps up the high-shine and brightens colours, making it an excellent choice for grabbing attention. If you choose to add lamination to your tent cards, you'll be able to pick from three different kinds: matt, velvet and gloss. The board is white and printed in full colour with your provided artwork. Just send your artwork to us at artwork@instantprint.co.uk with your order number and a member of our team will be in touch with a proof for you to approve before we send it down to print. We'll send your tent cards flat with creases showing you where the folds should go. COLOUR VARIATION Colour variation is inherent in any printing process, you should expect a 10% colour shift between print runs. All Tent Cards are printed on quality grade 350gsm silk. How do I upload my artwork? We print our tent cards on 350gsm silk. What material are tent cards printed on? Our ability to meet very tight delivery deadlines is subject to order specifications, quantities, machine requirements, third-party couriers and several other factors that may be beyond our control. We are continually improving the user experience for everyone, and applying the relevant accessibility standards to ensure we provide equal access to all users. Alternatively, you can upload your artwork to your basket. How do I assemble my tent cards? What lamination should I choose? If you experience any difficulty in accessing the content or services on this website, or if you have suggestions about improving the user experience, please contact: The production times quoted on our website are based on typical production schedules and cannot be guaranteed. Does it matter which side I choose for side 1 and side 2? Imagine a super glossy magazine cover! Velvet is our luxury lamination, adding a soft-touch to tent cards with a soft, matt finish. If you require a product urgently or by a specific date, please contact us before ordering and we will do our utmost to adjust our production schedules and meet your needs. Matt is a really popular choice, as it takes the shine away from the natural silkiness of the stock, making it easier to read the menu in artificially lit areas where there are lots of bright overhead lights. Then you'll get a pop up asking you to upload your tent card design. The thickness is similar to a birthday card, which is also something built to stand up on its own. This is a thick card with a slight bend to it when pushed down, meaning it's easy to assemble but you can rely on it staying standing. Upload each side separately. A great choice for high-end bars and hotels where customers are likely to pick up your tent cards for a closer look. Our tent cards are interchangeable so it doesn't matter which design you upload for each side - all you need to do is turn it around to show off one side or the other! Why should I add lamination? Lamination has two main purposes for tent cards: it gives them a particular look and feel, and helps prolong their life! Once your cards have been printed, lamination is applied over the top, so it acts as an extra protective layer. If you haven't got your artwork yet, you can still place an order. Follow these creases, expand the bottom out to create a base and voila! Your new free-standing promotional tools are ready to go! No glueing or sticking required. To upload your artwork simply add your order to your basket.
