However mentioning that isn't really saying much. What makes it work is the chemistry of Vince Vaughn and Owen Wilson, but if the appropriate casting of these talented comedians never took place I feel strongly that it would have been a totally un-funny, hugely misfired disaster. But there's just something about watching those two mess about, go wild and argue with each other the little things in life that really makes you want to laugh out loud. But that alone can't really save the film in it's entirety. The script of this film is disappointingly average and terribly overlong. It's not a very well structured comedy and sometimes feel's very improvised. It's easy to admire it, all in due to the fact it has plenty of comedic ambitions. There's a hugely successful attempt at being a classy, high end, sophisticated comedy and it perfectly balances raunch with sweetness which is very hard to do, but it's plot is a mess and it's overlong and you leave feeling you haven't come to know the two great lead's characters. It doesn't help that it's pretty forgettable and completely empty. But ultimately it's the fact that Vince Vaughn and Owen Wilson are in the movie itself that thankfully saves it, and it's quite enjoyable while it lasts. Which is a while. It's very unevenly crafted, but it's still reasonably and strangely satisfying fun. Directors C Super Reviewer Aug 01, 2012 *** out of **** John (Owen Wilson) and Jeremy (Vince Vaughn) are a pair of peculiar male specimens. They work as divorce mediators in Washington, D.C. pretty much year-round; that is, until what they call "wedding season" kicks in. It is then they spool through the local papers so that they may pick and choose which weddings they intend to "crash". And not "crash" in the sense that they cause a ruckus. Every time they assume the position of a distant relative or family friend (their roles are usually purposely bizarre) and every time it works. Their incentive is to pick up women at the weddings and then go to bed with them on the same night. There's a great montage in the beginning of the film illustrating multiple weddings - one Asian, one Jewish, and even an Italian wedding - and what awaits the boys whenever they crash one of them. To them, this is the good life. One day while looking through the paper, Jeremy discovers that the daughter of the U.S. Secretary of the Treasury (Christopher Walken) is getting married, and that the wedding will be one of abundant food, women, and perhaps even gifts for those who attend. They pose as "Uncle Ned's kids", a gag which creates an absolutely hysterical scene on its own early into the reception. Afterwards, the pair meets the rest of the family in attendance: daughters Claire (Rachel McAdams) and Gloria (Isa Fisher) and the Secretary's wife (Jane Seymour). John takes a particular liking to Claire and makes a successful attempt to get to know her father, while Jeremy claims Gloria, who he learns, is a virgin after having deflowered her on the nearby beach. The family takes such a liking to the duo that they are invited to the family's seaside estate. We learn so much more about the family in this visit, which we assume is brief (only a few days at the most). For instance, the Secretary has a gay son (Keir O'Donnell) who is also a skilled artist, and there's also a potty-mouthed grandma (a gag which isn't quite as funny as it might want to be). Claire, who John is falling head over heels in love with, also happens to have a boyfriend named Sack Lodge (Bradley Cooper); a pretty douchebag as only Bradley Cooper can portray. But of course, Claire is torn between these two men in her life, all the while, John and Jeremy must try to keep their true identities and intentions a secret from the family, which has shown them much hospitality. This is the kind of movie where it starts out raunchy and remains raunchy throughout but eventually dissolves into something of a sweet romance. "Wedding Crashers" is part buddy comedy, part frat comedy, and part romantic comedy/chick flick; but it's got something for everyone. The script is far from a great one and could have produced a God-awful movie had it not been put in capable hands; but alas, it was. It works mostly on the strengths of its actors. Wilson and Vaughn are so much fun to watch on-screen together and they alone produce the kind of classic comic chemistry that gets the film recognized in the first place. Christopher Walken also possesses clever comic timing as always; his performance is reminiscent of the SNL days of Walken, when he was joyous, hilarious, and over-the-top without admitting so much. McAdams and Wilson also work as a cute although hardly memorable couple. And Will Ferrell has a truly awesome cameo as Chazz Reinhold, the man who inspired the "rules" of wedding crashing that the characters reference throughout the film as if his actors were biblical. In my opinion, this is a hit-or-miss comedy that could just as easily humor you as it could offend you. For me it only did the first one; although I'm not easy to offend these days. Occasionally a joke will fall flat on its face but most of them go down easy and the film is still very quotable and funny. It's a lot of fun watching these actors express such joy in their profession and this seems to be the kind of movie where everyone involved had as good a time making it as those who are watching the film did watching it. It's far from perfect - it's often times unnecessarily crude, it's predictable, and even slightly overlong (but not too much) - and I acknowledge that much, but it's a wild ride from start to finish that slows down just in time for us to empathize with the material. And I would totally watch a sequel. The new comedy "Get Hard" stars Kevin Hart as an unlikely coach who trains Will Ferrell for a stint in prison. In one scene, Hart insists that Ferrell go to a top LA brunch spot and give oral sex to a random patron in the bathroom to learn - I guess? - the mechanics of prison rape. Yes, this movie equates consensual gay sexual activity with actual rape. Cut to Will Ferrell in a restaurant bathroom gagging at the sight of a penis for the amusement of a multiplex audience. Could it be the most homophobic scene in a comedy of the past ten years? It's certainly a candidate. To commemorate this weirdly ignorant movie, we've compiled a list: movies with homophobic scenes so blatant, they made us shudder. Sometimes a movie reeks of homophobia (See: that ol' heart-warmer "Cruising") and sometimes it's just a couple of moments in a film that feel mean-spirited to the LGBT community ("Wedding Crashers," etc.). In either case, yeeeh. "Braveheart" There were quite a few historical inventions in Mel Gibson's "Braveheart," like his own character's origins, and some odd Scottish battle traditions. But one creative add-on worth noting is the presentation of Prince Edward II and the defenestration of his lover Phillip. The Prince, historically, is said to possibly have been bisexual, but in this film, his character is constructed as overtly effeminate, cowardly and ineffectual. While his father the King is obviously a paragon of cruelty, the scene in which he casts Phillip out of a window to hurt his son is a violent knock at the homosexual relationship, and was shot in such a sparse manner that it practically played for laughs, insensitive to Edward II's loss. It played like a scheme to trump up the attraction of Edward II's wife Isabella to Gibson's manly William Wallace, as an opposition of caricatures. - Katie Hasty "The Hangover Part II" "The Hangover: Part II" features a transsexual Thai "ladyboy" stripper-hooker Kimmy who barebacks Ed Helms' drunken character while he is in a blackout. Queue the gagging (and gags) about anal sex. The joke is that the sex worker - played by trans porn actress Yasmin Lee, who plays her role powerfully - is sexy, but her penis makes her disgusting and anal sex is shameful. "The Hangover" use of trans and sex workers act as comedy crutches to such extremes are the bro-franchise's shame. In response to the accusation that the film is homophobic and transphobic, Lee said, "The role of Kimmy was never meant to be a role model, or someone that represents the community as a whole. For me it was a means of income as well as an opportunity to shed light on who I am, and more importantly our community and our struggle for equality." - Katie Hasty "Hot Tub Time Machine 2" The title doesn't suggest you're in for highrow humor, but "Hot Tub Time Machine 2" torpedoed the charm of the original in a number of key ways. First, no John Cusack. Second, not enough actual sense. Third - and most importantly - it offered up a climactic, surreal scene in which Craig Robinson and Adam Scott are chosen to have sex onstage in front of a cheering crowd. It is gay panic played for a cackling audience, and it is disgusting. As our own Drew McWeeny noted, "If you're going to make a joke about this kind of thing these days, you need to come at it from a perspective that is genuinely subversive and smart and that has something to say. Otherwise, this is just a five or six minute sequence about two guys crying in front of a crowd because they are forced to have sex." - Louis Virtel "Ace Ventura: Pet Detective" Watch the embedded clip. Right around 2:40 is where the score suddenly starts to work in "The Crying Game," and when Jim Carrey connects the dots and realizes that Sean Young's character is actually a guy, treat yourself to an extended over-reaction. I've heard several people defending this kind of beat since I published my "Get Hard" review, but I'm sorry... not only is it a preposterously tired joke, it is also grotesque and offensive. I don't understand someone saying, "But of course this is how a straight guy reacts." Is it? Is it really? Because it seems to me that part of being a mature human being is recognizing that sexuality comes in all sorts of forms and configurations, and just because someone's interests are different than mine doesn't mean I have to wretch like I've got food poisoning at the mere thought of it. Using the "Crying Game" cue just doubles the offense, because the Neil Jordan film's scene is brilliantly staged, and Steven Rea's reaction is nuanced and real, not a cheap joke that uses transgendered people as "grody." - Drew McWeeny "Night Shift" Prison and terrible gay jokes - like peanut butter and jelly! In the '80s, Ron Howard offered up "Night Shift" starring Henry Winkler as a dejected Wall Street lackey who becomes an attendant at a morgue. He and his loopy coworker (Michael Keaton) take advantage of their red-eye jobs and open a prostitution service. In one memorable moment, Winkler ends up in jail and mutters, "At this moment, I have sunk as low as I can go." Naturally we cut to a shot of his cellmate, a leering man who is cutting out paper hearts and giving Winkler the eye. Winkler adds, looking skyward, "I was wrong!" Ugh. You too, Ron Howard. - Louis Virtel "Adventures in Babysitting" This is the slightest entry on the list, but still: Is benign banter between ignorant children a big deal? When it's in a family movie blockbuster, I'd say so. In an early scene from "Adventures in Babysitting," Brad and Sara Anderson (Keith Coogan and Maia Brewton) argue about Thor's sexual orientation in angst-ridden fashion. As Brad repeatedly calls Thor a homo, you remember how much passive homophobia reigned in '80s comedies. - Louis Virtel "Boat Trip" Horatio Sanz and Cuba Gooding Jr. unwittingly board a gay cruise even though they are straight people trying to hook up with women. Oh, well. Honest mistake! No problem here, right? Well, none except this gay panic freakout for the ages. - Louis Virtel "Crocodile Dundee" 1986's second highest grossing film features a notorious scene in which Mick (Paul Hogan) grabs the crotch of a transgender woman in a crowded bar to prove that she was born with male genitalia. She is then literally laughed out of the room as he points after her and cries, "That was a guy! Guy dressed up like a Sheila!" It's a shocking moment of transphobia that's played for cheap, mean-spirited laughs. - Chris Eggertsen "Cruising" William Friedkin had to cut a legendary 40 minutes of footage from "Cruising" before it could get a pass from the MPAA, but that was mostly graphic sexuality and not the non-stop string of slurs and cartoonish depictions of what the filmmakers tried to emphasize was a look at one subset of gay culture, but not the entire culture. There's little doubt that the hostile reactions from characters in the film are period-appropriate and shouldn't be taken as the POV of the film, but the film's POV on both the leather bar subculture, and on any gay characters who exist outside the subculture sits somewhere between disgusted and horrified. You watch "Cruising" today and if you aren't laughing at the absurdity, you're scratching your head at where the line is between the filmmakers' fear and fetishizing of the culture and the culture's fetishizing of itself. It's fascinating and worthy of discussion, but more as a regressive time capsule than as a film of progressive merit. - Daniel Fienberg "Wedding Crashers" Well, here go those homosexuals again, preying on the irresistible Vince Vaughn in the middle of the night, stroking his chin, and announcing they've made sexual art about him. "Wedding Crashers" is proudly lowbrow through and through, but this moment is still one of the most annoying moments of "comic" homophobia in the past decade and a half. - Louis Virtel "I Now Pronounce You Chuck & Larry" As is often the case with Adam Sandler movies, "I Now Pronounce You Chuck & Larry" tries to have it both ways. When you get to the end, there's absolutely no question that the movie comes out in support of loving gay couples and gay marriage. This has to be acknowledged. But it'd be equally silly to deny that a goodly percentage of the 115 preceding minutes - Yes, this movie is obscenely long - are mostly about Kevin James and Adam Sandler's characters making it clear that in order for Chuck and Larry to do some silly thing involving life insurance, they have to lower themselves in the most humiliating way they can imagine, by pretending to be a gay couple. What follows is a string of "Being gay is gross" and "Having people think you're gay is gross" farce, punctuated by "If you're gay, you can get ultra-close to hot women" iciness, followed by "But really this is a great thing, even if straight guys might think it's gross." The scene in which Jessica Biel, soaking wet from a rainstorm, disrobes in front of Sandler's character and begs him to squeeze her breasts to see how real they are has its merits, but "enlightened quality" is not one of them. It's like "Tootsie." Only awful. - Daniel Fienberg "Eddie Murphy: Raw" I did a lot of jokes about homosexuals a few years ago, and faggots were mad. Gae, I wonder why. Let me make it clear, I think Eddie Murphy was an extraordinarily gifted stand-up comic. He could talk about anything and totally own a crowd. I saw him live on the same tour where he worked on the material for "Raw," and I can honestly say it's still one of the three or four most impressive live comedy shows I've ever seen. But when you look at this clip now, or the whole film, it's clear that this is a moment that has thankfully passed. Judging the material on its own, it is a clear expression of a culture that needed to make homosexuals "the other," as clear an expression of hatred as anything on this list. - Drew McWeeny "Tons of Michael Bay movies Did you catch this? Gawker did a great mashup of homophobic asides in Michael Bay films in 2014, including an extended "gay panic" scene in "Bad Boys II" where Martin Lawrence and Will Smith realize that their conversation about Lawrence's character being shot in the butt - which sounds like anal sex out of context (hilarious!) - is being broadcast to an entire electronics store. Also gotta love that green transformer affecting stereotypically "effeminate" mannerisms to make fun of someone for being scared. Watch all the fun hijinks here. - Chris Eggertsen
