

# Definition and Description of Meningitis Types Essay

The screenshot shows the EssayPro website homepage. At the top, the logo 'ESSAYPRO' is on the left, and navigation links 'How To Order', 'Reviews', 'About Us', and 'Write My Essay' are in the center. On the right, there are links for 'DBA: EPRO', 'Log In', and a blue 'Sign Up' button. The main banner features a student sleeping at a desk with a cup of pens. The text reads: 'WRITING SERVICE AT YOUR CONVENIENCE', 'You - Send us your homework We - Do it all for you', and 'Grab your original paper for just \$10 per page with a free plagiarism report included'. A blue 'Write My Essay!' button is present. A 'Calculate the price' widget is overlaid on the right, showing options for 'Writing', 'Rewriting', and 'Editing', a dropdown for 'Essay (any type)', 'College', and '2 weeks', a word count of '1 page / 275 words', and radio buttons for 'Double spaces' (selected) and 'Single spaces'. The price is '\$11.4' with a flame icon, and a blue 'Write My Paper' button is at the bottom. Below the banner, three review widgets are shown: 'EssayPro Reviews' with a 4.9 rating, 'ResellerRatings' with a 4.9 rating, and 'Sitejabber' with a 4.8 rating.

Meningitis is a disease that involves infection of the tissues that cover the brain and spinal cord, these tissues are called meninges. There are three types of meningitis; viral, fungal, and bacterial. Viral meningitis usually resolves on its own. Medications can be prescribed for symptoms but the virus just has to run its course. The viral form is often misdiagnosed as the flu because the symptoms so similar. It's the most common type of [meningitis](#) and can cause some long term effects such as headaches and memory loss. Although it is the most common, there are no vaccinations to prevent it. This is because it spreads much like the common cold the best prevention is to wash your hands frequently especially before eating or handling food. Another sure way to prevent the illness is to not share lipstick or lip balms and to refrain from sharing drinks. Fungal meningitis is the rarest. It most often presents itself in people with suppressed immune systems. Bacterial meningitis is the most dangerous type and should be approached as a medical emergency. This form of the disease can be life threatening if treatment is delayed. Death may occur from bacterial meningitis in as little as twenty four hours. People who survive may develop health problems, have damage to extremities or may even have to have extremities amputated. There is a vaccine for Meningococcal Meningitis, one cause of bacterial meningitis. It is recommended for people to get the vaccination between eleven and eighteen years of age.

What happens is a causative agent enters the bloodstream and offsets an inflammation of the meninges. Also, inflammation of mater occurs causing Increased Cranial Pressure (ICP). Bacterial meningitis can also be an opportunistic infection i...
