

Insufficient Health Care in Developing Nations Essay

The screenshot shows the EssayPro website homepage. At the top, the logo 'ESSAYPRO' is on the left, and navigation links 'How To Order', 'Reviews', 'About Us', and 'Write My Essay' are in the center. On the right, there are links for 'DBA: EPRO', 'Log In', and a blue 'Sign Up' button. The main banner features a student sleeping at a desk with a cup of pens. Text on the banner includes 'WRITING SERVICE AT YOUR CONVENIENCE', 'You - Send us your homework We - Do it all for you', and 'Grab your original paper for just \$10 per page with a free plagiarism report included'. A 'Write My Essay!' button is present. A 'Calculate the price' widget is overlaid on the right, showing options for 'Writing', 'Rewriting', and 'Editing', a dropdown for 'Essay (any type)', 'College', and '2 weeks', a word count of '1 page / 275 words', and radio buttons for 'Double spaces' (selected) and 'Single spaces'. The price is '\$11.4' with a flame icon, and a 'Write My Paper' button is at the bottom. Below the banner, three review sections are shown: 'EssayPro Reviews' with a 4.9 rating, 'ResellerRatings' with a 4.9 rating, and 'Sitejabber' with a 4.8 rating.

A very global issue is the insufficient health care available to pregnant women and their newborn babies in developing countries. "Greater than 500,000 women die each year as a result of complications during pregnancy and childbirth." (Schwartz, 2013) The majority of these deaths (85%) are occurring in sub-Saharan Africa and South Asia. This global issue is greatly affected by the lack of health professionals, not enough resources and preventable diseases that aren't being controlled. It is extremely important for the public to take action because it is countries similar to Canada that have the resources to make a difference. These developing countries can be put on a better path by offering finances however; the most important resource that can be offered is education.

The reason as to why developing countries have much higher death rates is because of the health care that is being provided. The maternity statistics are nothing short of horrific and in most developing countries, the reason for a large number of these deaths is due to inadequate prenatal care and an absence of health professionals during procedures. (Schwartz, 2013) Many pregnant women in developing countries will not go full term because of many diseases, malnourishment and lack of prenatal care. Preventable diseases include Tuberculosis, HIV/AIDS and malaria. In malaria- endemic countries, 50 million women become pregnant. Having malaria while pregnant is one the world's most important public health concerns. (Schwartz, 2013) A very concerning virus during

[pregnancy](#) is HIV/ AIDS because it is very threatening to the mother's health and also extremely concerning for the fetus. If the baby is delivered vaginally, it has a very high risk of transmission and in s...

...lth care professionals. Unfortunately, in developing countries it is a much different scenario with 500 000 women dying due to pregnancy. It is not sensible to let this continue and if a change is not made then the people in developing countries are not being given the chance at life that people in developed countries are being handed from the day they are born.
