

Grizzly Bears in North America

The screenshot shows the EssayPro website homepage. At the top left is the EssayPro logo and navigation links: "How To Order", "Reviews", "About Us", and "Write My Essay". At the top right are links for "DBA: EPRO", "Log In", and "Sign Up". The main banner features a student sleeping at a desk with a cup of pens. The text on the banner reads: "WRITING SERVICE AT YOUR CONVENIENCE", "You - Send us your homework", "We - Do it all for you", and "Grab your original paper for just \$10 per page with a free plagiarism report included". A "Write My Essay!" button is present. A "Calculate the price" calculator is overlaid on the right, showing options for "Writing", "Rewriting", and "Editing", with "Writing" selected. The calculator also shows "Essay (any type)", "College", "2 weeks", "1 page / 275 words", "Double spaces" selected, and a price of "\$11.4" with a "Write My Paper" button. Below the banner, three review widgets are shown: "EssayPro Reviews" with a 4.9 rating, "ResellerRatings" with a 4.9 rating, and "Sitejabber" with a 4.8 rating.

Grizzly Bears in North America

Introduction

The Grizzly bear (*Ursus arctos*) has long been considered to be the symbol of the wild. They are beautiful, powerful and at the same time vulnerable animals. They are known to survive in remote areas not inhabited by humans. The Grizzly was once able to occupy most of the land from northern Mexico to Alaska and most places in between. With a disappearing natural habitat and one of the lowest reproduction rate of any mammal in North America the Grizzly [bear](#) has seen population number fall dramatically. Most Grizzly bears left in the continental United States are located in four states near [Yellowstone National Park](#). Canada has Grizzly populations in five provinces. The state of Alaska has the largest population of these amazing animals. With change in habitat due to human involvement and low reproduction rates, Grizzly bears have had a hard time sustaining population numbers. This has caused them to virtually become non-existent in certain areas of North America and is forcing the bears that are left to move to more sufficient areas that can sustain their populations.

Classification

Grizzly bears are classified using a taxonomic hierarchy as are most living things in this

world. The classification is by this hierarchy class, order, family, genus, species, and subspecies. The classification of the bears is as follows: Mammalia, Carnivora, Ursidae, Ursus, and Arctos. The Mammalia class includes warm blooded animals with hair to regulate body temperature. The Carnivora class includes animals that eat meat and have large sharp teeth. Ursidae is a small group of 8 species which are all bears. Ursus Arctos is the scientific name for the brown bear of North America.
