The way in which the majority of the world now communicates is through Social Network Sites which is very common in today's society. Over the past ten years Facebook has grown to be the number one social network site utilized in the world. The purpose of this research is to educate parents on the dangers it can bring to adolescents. The primary audience will be parents of adolescent children. This research will explore the disadvantages of adolescent communication on [Facebook](#) media. Focusing on Cyberbullying, Sexting, and Facebook Depression, looking at how this behavior can have a negative impact on them.

Cyberbullying

Traditional adolescent [bullying](#) in the 70's and 80's of threats to do bodily harm to another adolescent either before school, after school, on the playground, or even in locker rooms have become somewhat a thing of the past. With today's advanced technology such as cell phones, and Social Network Sites you now have what is called Cyberbullying. Cyberbullying is any behavior performed through electronic or digital media by individuals or groups that repeatedly communicates hostile or aggressive messages intended to inflict harm or discomfort on others (Tokunaga 2010).

This new trend of harassment amongst adolescents has become more and more prevalent than ever before. Any adolescent ranging from the age of 13 to 18 can obtain a profile on Facebook.

Facebook media which is the number one social network site in the entire world has become a caveat for Cyberbullying. There is no need for the aggressor or better known as the bully to wait until there are other children around to see the pain that they can inflict on others. This electronic accessible website ultimately allows a...
