In an exceedingly vast forest in Mexico, the world's largest woodpecker is flying around rummaging for food from tree to tree. The bird measures about two inches tall, the males have a red-sided crest and have black feathers, and the feminine is all black, towards the bottom, they both have white plumages towards the tail, and a protracted beak. The fowl is an Imperial Woodpecker, it subsists on fruits, nuts, carpenter ants and beetle larvae. This feathered friend exists peacefully in this forest. In the future, a band of men from a neighboring logging company comes to this wooded area and begins to reap some timber. Next, the fellows begin to cut down the trees where this woodpecker resides in. Then the men realized that the woodpecker is a nuisance, so they decide to poison the woodpecker, so the woodpecker perishes. Imagine a world without this bird, but we do not have to because this is actually reality. Today the Imperial Woodpecker is extinct for the very reason of that of our actions as human beings. This is happening each day within the world we live in, an immeasurable amount of animals are becoming extinct or endangered of becoming extinct because of the activities of civilization. Why should we care about habitat destruction and animal [extinction](#)?

Thomas Jefferson once stated, "For if one link in nature's chain might be lost, another might be lost, until the whole of things will vanish by piecemeal" ("Problem"). Countless

number species of animals hunt smaller creatures, for example, frogs eat the mosquitos so if the frogs become extinct then we are going to have quite a few more mosquitos that carry an enormous amount of additional diseases like West Nile Virus. Several of the insects facilitate pollinate the flower...
