We all have sat down and made out our New Year Resolutions and most of them are to go on a diet. When it comes down to it one you stop doing it, it doesn't work, or keep getting sick or many, many different reason why we quit dieting. Many Americans probably didn't think about why they do a diet, the reason the doctors tell the certain person to go on a diet and it could be a chance that many American's are bullying themselves or even other are bullying them into going on a diet. When a person is overweight it puts stress on the persons lungs, heart and skeleton because it can't hold the weight form the fat. Well not worry and not get to scared yet I am going to tell a person who this concern to, but the Doctors say, where it starts, effects to a person's health, a person's not have to be overweight to be doing a diet, and how a person can stay on a diet and still eat fast food at the same time, to me this sounds amazing so let's get going and learn some great ways for our sleeves.

We all hate how the Doctors talk by using these big words that make no common sense to use , but some people just shake our heads and take the scribble hand writing to the pharmacy and get whatever they put on there, but have any person ever thought what the doctors thoughts on the idea of [dieting](#). Frist thing is what causes weight gain and how people can change it all by doing three big factors which are watching our balance of our metabolism, make sure a persons have plenty of energy , excising and then know what

are genes are that we get our parents. (Lean, Clinical Handbook of Weight Management book) With genes weight can't just come but the lack of exercise and the way a person eat. (Lean, CHWM) How does this happen is a key to lose weight, how a person's body holds the person's fat, and more. Based off doc. Lean of Clinical Handbook of Weight Management book says, "Lipid or fat, within adipose tissue, represents the accumulated stored energy that is not use up imminently. Extra calories from carbohydrates, protein and fat itself are converted into fat starts in Adipose tissue to be used if your food supply dwindles.
