

# Fishing for Trouble Essay

The screenshot shows the EssayPro website homepage. At the top, the logo 'ESSAYPRO' is on the left, and navigation links 'How To Order', 'Reviews', 'About Us', and 'Write My Essay' are in the center. On the right, there are links for 'DBA: EPRO', 'Log In', and a blue 'Sign Up' button. The main banner features a student sleeping at a desk with a cup of pens. Text on the banner includes 'WRITING SERVICE AT YOUR CONVENIENCE', 'You - Send us your homework We - Do it all for you', and 'Grab your original paper for just \$10 per page with a free plagiarism report included'. A 'Write My Essay!' button is present. A 'Calculate the price' widget is overlaid on the right, showing options for 'Writing', 'Rewriting', and 'Editing'. The selected 'Writing' option shows a price of '\$11.4' with a fire icon. Below the banner, three review widgets are displayed: 'EssayPro Reviews' with a 4.9 rating, 'ResellerRatings' with a 4.9 rating, and 'Sitejabber' with a 4.8 rating.

In 1999 near the Galapagos Islands, Rob Stewart, 22, an underwater photographer and filmmaker, was driving when he discovered something that changed his life forever. It was a long line fishing rig hung with hundreds of dead sharks on a single fishing line that Stewart explained had the potential to reach from Earth to space. This [fishing](#) line is known by conservationists as a “curtain of death” (Kielburger). Overfishing is the fishing of a species at levels too high for the species to reproduce. This can greatly reduce [fish](#) population and drive species toward extinction. Fishing has provided the world with food and jobs that have remodeled Earth’s cultures and lifestyles. Fishing is practiced by local fishermen, commercial fishing rigs, and fishing hobbyists. However, when industrialization swept the world, fishing became an evident problem. Various nations all across the world decided to commercialize fishing altogether, which had caused a number of problems the world faces today. Fish populations plummeted and some species were even wiped off the face of the earth. Commercial fishing boats in competition devastate marine ecosystems and push species to their limit. Overfishing is a tremendous problem in the world that must be regulated because it destroys underwater ecosystems, jeopardizes future fish stocks, and places the global food economy at risk, a closely monitored fishing industry’s recovery can also help support nations across the world. Overfishing has stressed fish populations to significantly low numbers, and the chances of

recovery are slim. "According to European Union data, 80 percent of Mediterranean fish stocks and 47 percent of Atlantic stocks have been overfished" (Jolly). These percentages show how overfishi...
