

Drones: Remote Piloted Aerial Vehicles

The screenshot shows the EssayPro website homepage. At the top, the logo 'ESSAYPRO' is on the left, and navigation links 'How To Order', 'Reviews', 'About Us', and 'Write My Essay' are in the center. On the right, there are links for 'DBA: EPRO', 'Log In', and a blue 'Sign Up' button. The main banner features a student sleeping at a desk with a cup of pens. Text on the banner includes 'WRITING SERVICE AT YOUR CONVENIENCE', 'You - Send us your homework We - Do it all for you', and 'Grab your original paper for just \$10 per page with a free plagiarism report included'. A 'Write My Essay!' button is present. A 'Calculate the price' calculator is overlaid on the right, showing options for 'Writing', 'Rewriting', and 'Editing', with 'Writing' selected. It also shows 'Essay (any type)', 'College', '2 weeks', '1 page / 275 words', 'Double spaces' selected, and a price of '\$11.4'. A 'Write My Paper' button is at the bottom of the calculator. Below the banner, there are three rating sections: 'EssayPro Reviews' with a 4.9 rating, 'ResellerRatings' with a 4.9 rating, and 'Sitejabber' with a 4.8 rating.

“Speak softly and carry a big stick; you will go far.” (Roosevelt, 1900) It’s not in every case today that the man with the biggest stick will win, but how he uses the stick will determine the outcome. In this case the stick is the advancement of airpower used in the military. Making its way from hot-air balloons to unmanned super-jets. Unmanned vehicles have been used all across the world since the mid 1800’s, really taking off during and post World War One. Built originally for Intelligence, Surveillance, and Reconnaissance (ISR), Unmanned systems are taking future of the air to a whole new perspective. “August 22nd, 1849, Austrians who controlled much of Italy at the time, launched some 200 pilotless balloons against the city of Venice. The balloons were armed with bombs controlled by timed fuses -” (McDaid, 2003) With this being the first ever recorded use of unmanned aerial systems, we are given some sort of clarity on how much advancement has taken place in the skies. During the last stretch of World War One, the Navy had brought out an intricate invention that could offset the playing field. “Kettering Aerial Torpedoes”, bi-planes that were modified and laid with explosives to catapult behind enemy lines at select targets. These torpedoes however could not sustain a consistent flight and would drop after a determined amount of time in the air. Planes were later being manipulated by remote controllers in order to crash land into a selected target through radio and television frequencies. The plan immediately had many flaws and needed more time to develop a

better outtake. Thus, the era of cruise missiles were brought to the table by German scientists and their crafty engineering. During World War Two the U.S. had a m..... middle of paperGHT RESEARCH CENTER. (J.
