

# Human Impacts on the Earth

The screenshot shows the EssayPro website homepage. At the top, the logo 'ESSAYPRO' is on the left, and navigation links 'How To Order', 'Reviews', 'About Us', and 'Write My Essay' are in the center. On the right, there are links for 'DBA: EPRO', 'Log In', and a blue 'Sign Up' button. The main banner features a student sleeping at a desk with a cup of pens. Text on the banner includes 'WRITING SERVICE AT YOUR CONVENIENCE', 'You - Send us your homework We - Do it all for you', and 'Grab your original paper for just \$10 per page with a free plagiarism report included'. A 'Write My Essay!' button is present. A 'Calculate the price' widget is overlaid on the right, showing options for 'Writing', 'Rewriting', and 'Editing', with 'Writing' selected. It also shows 'Essay (any type)', 'College', '2 weeks', '1 page / 275 words', 'Double spaces' (selected), and a price of '\$11.4' with a 'Write My Paper' button. Below the banner, three review sections are shown: 'EssayPro Reviews' with a 4.9 rating, 'ResellerRatings' with a 4.9 rating, and 'Sitejabber' with a 4.8 rating.

To all living things the difference between life and death rest amongst change. Repeated similar routines, ways of life, are how earth's organisms go about their daily lives, always surrounded by familiarity. In the limitless universe, however, "change is the only constant" (Heraclitus). Earth has been changing since it composed of only simple gases and star dust. As these simple elements fell into the gravitational spiral of the solar system, every detail and event, massive and minuscule, resulted in creating the small probability of a planet that could inhabit [life](#), earth. Earth holds that slight chance of regulating itself and keeping that delicate balance of life. Earth has diminutive change compared to the rest of the vast universe. Life on earth is delicate making change life's biggest threat. Life takes so much time to adapt. And it is humans that are changing and disrupting the balance of life. That is why now, seeing earths living conditions change more rapidly than organisms can handle, making green and eco-friendly choices are so important. People are causing major changes in the biosphere by altering their own and others ecological limits, destroying and unbalancing the environment, and by depleting the amount of earths biodiversity.

The altering of their own ecological limits impact humans and others in the biosphere. Since the beginning of Homo sapiens, the humans have proven their dominance to

extraordinary measures, but all great things have an end. How we know this will happen is through the study of population [ecology](#). Population ecology is the understanding of relationships between organisms and their interactions with their physical surroundings. All living organisms have at least these two ambitions; in...
