

# We Can Stop Climate Change Essay

The screenshot shows the EssayPro website. At the top left is the EssayPro logo and navigation links: "How To Order", "Reviews", "About Us", and "Write My Essay". At the top right are links for "DBA: EPRO", "Log In", and "Sign Up". The main banner features a student sleeping at a desk with a cup of pens. Text on the banner includes "WRITING SERVICE AT YOUR CONVENIENCE", "You - Send us your homework We - Do it all for you", and "Grab your original paper for just \$10 per page with a free plagiarism report included". A "Write My Essay!" button is present. A "Calculate the price" calculator is overlaid on the right, showing options for "Writing", "Rewriting", and "Editing", with "Writing" selected. The calculator also shows "Essay (any type)", "College", "2 weeks", "1 page / 275 words", "Double spaces" selected, and a price of "\$11.4". A "Write My Paper" button is at the bottom of the calculator. Below the banner, there are three review sections: "EssayPro Reviews" with a 4.9 rating, "ResellerRatings" with a 4.9 rating, and "Sitejabber" with a 4.8 rating.

Climate change can be solved once we are willing to adopt certain changes to our everyday lives. In our society, the burning of fossil fuels, deforestation, and the nations decaying infrastructure, are all reasons as to why climate change has become such a subject of great importance. If we are able to change these three parts of our society we can help the environment and slow down the gradual changes of our climates.

The burning of fossil fuels has greatly harmed our environment and is a leading cause as to why climate change has become such a threat to our way of living. In May of 2013, the carbon dioxide levels in the atmosphere reached 400 parts per million, an increase of more than 40 percent since the beginning of the Industrial Revolution. This could cause the Arctic Ocean to be nearly ice-free during the summer by 2020(Overland and Wang, 2013).

The problems associated with climate change are mainly due to the combustion of fossil fuels. It is difficult however to stop this problem. The solutions of being more energy efficient, and improving emissions-control technology, can help lessen the environmental damage done by [fossil fuel](#) use they ultimately only alleviate the pressure of increase of pollution and affluence(Delucchi, Jacobson 31).

In the search for alternatives to fossil fuels, scientists and policy makers have focused on three options: nuclear power, energy from biomass; and a combination of wind, water, and solar power. Nuclear power, however, is much more costly and runs the risk of having it fall into the wrong hands where it could be turned into a weapon of mass destruction. The third option entails wind turbines, photovoltaic power plants and rooftop systems, concentrated solar thermal power plants,...

... middle of paper ...

...ay's world. We as people will dictate whether we are able to help the environment or whether we let it continue to slide into a hopeless state.
