Galaxy the smartphone is what we use in our society's utopia we use this smartphone for numerous explanations. This high class electronic is what many people use in their everyday life for help on things and to keep in touch with others. Galaxy's help you talk to someone in an instant even if family members or friends are across the world. This electronic also can help you take pictures in an instant the most amazing part of the Galaxy is how people can save those pictures as long as they [want](#). The phone is like a little computer in your hand having to be able to hold a computer like device in your pocket or hand is wonderful. The phone is similar to a computer ,because you can have your phone on Wifi or in service letting you search up anything at any time. Galaxy's also have apps such as Instagram; snap chat, Facebook and much more. Phones are what we rely on because it's faster and right by our sides the whole time when we want and need them. Instead of going to go talk to someone that's far away or close you could just call them with your phone which many say is faster than going to go see someone and tell them something or talk to them.

People compare the Galaxy smartphone to a computer because of what the device does

to have similar results towards it. Many know that the computer can search anything you would like that's exactly what the Galaxy does. Being able to go on Facebook, YouTube and those other sites is also another similarity on how the computer and Galaxy are the same. The only difference is the computer has to stay in one place, unlike this computer like device can go everywhere. The only way the computer could go somewhere else is if it was a laptop but that runs on Wi-Fi and the phone could also be...

... middle of paper ...

... for its quick calls and texting and its amazing apps service. The way it compares to the computer on how they both work the same and seem to look sorta the same. Helping you from "boredness" to being able to get out of that phase and get entertained in seconds. Having all kind of people all over the world having that Galaxy s4 in there hand just looking at it instead of looking at the person there hanging out with. Seeing a person looking into it like if it is their soul also seeming if their life depended on this phone. Being able to have a device that could help you with so many events such as a portfolio and looking up things in the dictionary faster. Seeing the latest fashions to what new songs are out ,having that ability to do so much stuff with this phone is what can contribute to our society.
