

Forresters Motors – ISO 9001 implementation

The screenshot shows the EssayPro website homepage. At the top left is the EssayPro logo and navigation links: "How To Order", "Reviews", "About Us", and "Write My Essay". On the top right, there are links for "DBA: EPRO", "Log In", and a blue "Sign Up" button. The main banner features a student sleeping at a desk with a cup of pens. The text reads: "WRITING SERVICE AT YOUR CONVENIENCE", "You - Send us your homework", "We - Do it all for you", and "Grab your original paper for just \$10 per page with a free plagiarism report included". A blue "Write My Essay!" button is present. A "Calculate the price" calculator is overlaid on the right, showing options for "Writing", "Rewriting", and "Editing", with "Writing" selected. It also shows "Essay (any type)", "College", "2 weeks", "1 page / 275 words", "Double spaces" (selected), and "Single spaces", resulting in a price of "\$11.4" with a flame icon. A blue "Write My Paper" button is at the bottom of the calculator. Below the banner, there are three rating sections: "EssayPro Reviews" with a 4.9 rating (5 stars), "ResellerRatings" with a 4.9 rating (5 stars), and "Sitejabber" with a 4.8 rating (5 stars).

As a newly founded company, Forresters Motor, our main focus will be on the manufacturing of electrical universal motors specified for washers. We look to implement a quality management system into the workforce over the coming years. By working with BSI, the company seeks to achieve ISO 9001 as we believe this will give us a massive competitive advantage and help kick-start our business into a successful direction. ISO 9001 is the standard recognised internationally for the quality management of our business. This will help keep us on top and control the standard of quality across all of our operations. With ISO 9001 in place, we believe our company will continue to improve each year and compete with close by company rivals. BSI can provide various packages which can help and steady the process of gaining this certificate, which is extremely helpful as we are newly founded. I believe we are starting in the right direction as this certificate will bring many advantages. We will constantly meet customer demands in addition to increase the efficiency of our electric motors. Furthermore, by increasing the standard of the manufacturing process, we will reduce defects, which will lead to less money spent on scraps, thus, saving the company money. The first task involved in implementing the ISO 9001 was to appoint a quality manager. His role was to dictate the standard at which our company produced our goods. The budget allocated was £30,000 which was to cover everything involved with implementing the new system. Ten employees would then be fully

trained followed by an internal audit which would eventually lead to inviting a 3rd party organization to obtain the ISO 9001 certificate. The full stages involved are; • Management buy-in and commitment • Training of staff • Appropriate documentation • Policy • Internal audit procedures • Registration process • Obtaining
