Fast connections do not have to perform your Android device root or install a user defined by ROM so it can look new. If you are tired of the standard user interface or you just want to add a personal note, download one of the best Android launch tools is an easy way to do it. Basically, the Start program is a program that shows the original screen, controllers and app drawers. The standard Start-up app on your phone is usually quite limited, taking into account customity and functionality, while the third party options are played. These startup devices offer a quick and simple way to make your device feel like yourself, and most can be downloaded for free. Despite the fact that you want something minimal or too adaptive, you are a Android launching tool. You can easily add more style and application to your Android Home screen by downloading one of the launch programs below. Even if you already have one of the best Android phones, there is always the opportunity to revive things. Nova Launcher 3 images of Nova Launcher have long been synonymous with the Best Android launcher. It is powerfully adjustable to change almost everything, depending on the style of the program symbol, the size of the symbol, the program drawers and much more. Add the support of symbols and thematic packages and open a new world of adaptation options. Even with so many features, Nova is fast, easy and easy to use. Includes everything you could ask for a third party launching measures, including applied app drawers, side effects, personalized icons of personalized packets, and much more. It is also one of the most supported Android launches with new versions and has a live adaptation community. You can also correct the settings to make it easy to restore if you replace your phone or restore your Android device. The Premium version offers even more ways to apply a launch tool to your favorite look. If you have a minimal desire, you should find a clean and thin user interface inspired by the launch lawn mowers 2, but also offers large adaptation options that are not available in Google's offer. The 2 lawn chair is not included in the Nova Launcher and has all the essential elements needed to apply the original screen according to your languages. You can change the look of your characters with individualized symbols, customize the size of the characters, apply the desktop and the transition effects, play with different gestures and change the layout and the search bar style. Also, the so-called free without shopping for apps or ads. Available on all devices with Android 9 at the latest versions. 3 images in Niagara are a relatively new launcher, but it has grown more thanks to the innovative approach. Niagara has a modern, minimal user interface and elegant animation. The created XDA Member 8BitPit and XDA recognized developer Maxr1998, Niagara Launcher, demonstrates programs on a vertically sliding list. You can select your favorite apps to display on the home screen and browse other hidden programs by typing in one hand with an easy-to-reach alphabet style browsing menu. Reports from your favorite programs are integrated during startup so you can answer without opening the program. Niagara is suitable, but your capabilities are limited because of its minimalism. It supports controllers, program messages, gestures and various options to customize the look of the launch program. The program also supports Android 12 dynamic colors, many launch icons, such as the search bar, Niagara button and background, can match your screen background color. Current screen. Most accessories, such as calendar and weather controllers, expanded customization capabilities and pop-up controls, are locked behind the paid wall. Niagara has absolutely no ads to maintain balance. Click the link below to check it. The 3 image AIO launch program works differently from traditional Android launch. There is a lot of information on one screen instead of a standard home screen. They include different categories, such as frequent programs, messages, collector, mailbox and control panel. All this is easily accessible as soon as you pull. The system information pane at the top allows you to quickly check important system information. Meanwhile, the search button in the lower left corner allows you to search for apps, contacts and even information online. This opens the settings for holding the search buttons and opens the speed menu after pulling. The Premium version unlocks additional features, including support for Android controllers, user interface motifs and receiver, icon packs and custom font size. 3 Pictures Microsoft Launcher is a productivity-oriented launcher programYou can customize the main screen, movements, application sockets, icon shape, status bar visibility and more. A great feature is a chip card that can be turned to the left with tasks, fast notes, calendar, frequently used applications and time. It is a convenient way to stay up-to-date with the latest tasks in the Microsoft ecosystem. Microsoft initiator also includes beautiful wallpapers, dark themes, backup and recovery features and improved performance. It also offers customizable movements such as scroll, finger holding and double touch, which facilitates users to navigate the interface. The application uses optional movement access, including the screen lock and the latest application screen. This is a trigger that you should try if you are using a lot of Windows applications in your daily life. 4 Illustrated action trigger is another wonderful third section that has been circulating around for a while. The Trigger, which is downloaded more than 10 million in the Play Store, has a powerful user base and a target audience. The action launter has seen many revisions over the years. In the first days, AOSP offered a design and feeling similar to the series starter. But now he is inspired by Google's Pixel launcher. In the case of features and adaptability, the Nova launcher can easily compete. Event Trigger offers tons of features from the stylized material to themes and a completely customizable search panel to smart folders and window items sets. Trigger also has a powerful search feature called Action Search, which allows you to search directly on your website and phone directly on your website and phone. In the meantime, Smartsize symbols resize the application icons automatically the recommended material design according to the icon size. Action Launcher can be downloaded free of charge with other features and private paypal. 3 Picture Smart Launcher is a regular application folder that regulates all your applications in six main categories: communication, internet, games, media, tools and settings. This classification and the existing search button in each section make it easy to install and search applications. At the bottom of the home screen, there is also a "smart search panel" that provides a single communication point to search for people, applications, web and even Google Play. Smart Launcher offers font styles, themes, symbols, colors and many other customization options. The premium version has the opportunity to customize the very interesting application category.Multi-home page widgets, special icon ranking and pop-up window widgets. 3 Image Poco Launcher Xiaomi includes a partially customizable home screen. Compared to other options, it may look small, but the initiator develops on a simple but familiar user interface. It consists of a single-click application drawer and applications can be easily found by browsing different categories. Poco Launcher allows you to customize the background, application transparency, icon size and application drawer and help you manage the application categories. It also supports icon packages so that you can use special icons if you prefer Xiaomi icon style. Download Poco Launcher without ads. 3 Picture BIG Launcher is a simple Android initiator to use for the elderly. The icons are large and the grided-style has distinctive colors that allow you to easily distinguish different applications on the home screen. It also gives priority to the most important applications for elderly, such as translators, messaging, gallery, camera and sauce button. There is also a button that takes you to the application drawer. High-contrast home screen is also ideal for visually impaired users. BIG Launcher, text size, full screen view, navigation bar, safe border size and so on. It has multiple customization options, including. Keep it simple to avoid overwhelming for older people. One-time payments unlocking more roads to customize your initiator. 3 Picture If you want your Android to mimic the iOS user interface, this starter will help you do it. The iOS 16 Launcher has a design similar to iOS 16 from lock screen to control center, animations, wallpapers and widgets. Just as in iOS 16, you can hide applications and customize various aspects of the trial. There are many options to help you approach the look and style of iOS 16. Download a separate application for features such as application lock screen, control center and auxiliary touch. But when everything is in place, the initiator is very similar to the default iOS launcher. Android's beauty, isn't it? You can try many different smartphones exterior and user interface type by just downloading the starter. 3 Photos Lynx Launcher is a relatively new initiator in the Android world. He may still have his feet with more than 50,000 downloads, but that did not prevent him from winning. Lynx Launcher offers a clean home screen with easy movements to rememberFollow him. According to the programmers, the launch program was inspired by the Gnome environment, which is clear enough by the starting screen. It has many adjustment options, including the possibility of downloading new reasons from the programming sites, even if I find only four topics that will be available at the moment. In addition, it is possible to obtain non-standard icons in the Google Play Store, change the location of the Docking Station, choose Dark modes and make several steps. Navigation based on gestures is quite fast and uniform and can be adapted according to your desires. Lynx Launcher can be downloaded and used for free, but there is also a professional version that provides access to the screen passages, more fixed pages, additional data options and more. The wide launch is another interesting application of the replacement of the starting screen. Try to differ from the other appetizers, offering the main screen three times wider than the standard screen, so you don't limit yourself to the usual size and mesh of the main screen. Also obtain many adjustment options, including a selection of styles of icon, motifs, decorative stickers and many others. In addition, the decoration mode allows a whale for its creativity. It also has its mini applications, known as candidates who provide various functions and can be connected to the main screen. To summarize, if you really intend to try something else, you have to do it. The large start program can be downloaded and used for free. The adjustment of the main screen with Android is not easy for the best launch program with Android. With so many options available, you will certainly find an activist who corresponds to your style and unique needs. If you are looking for a minimalist rush, Niagara is a good solution. For those who want to imitate the appearance and operation of iOS, the iOS 16 start program is available. Big Launcher is ideal for the elderly and Lawnchair 2 provides impressions similar to pixels with further adjustment. Finally, Microsoft Launcher can help increase your performance, while Nova is a classic of all time, which will delight a wide range of customization and functions. When you
