

I'm not a bot

The Profoto line offers high-quality studio lighting solutions that are portable and affordable. The Pro-7b is a top choice for those seeking both portability and affordability, offering 1200 Ws of power per battery and recycling times as short as 2.8 seconds. Profoto's Light Shaping System prioritizes flexibility, with the flash tube located outside the lamp body and zoomable light shaping tools such as reflectors, umbrellas, softboxes, grids, spotlights, and special effects. The company also offers a range of accessories, including batteries, cables, and stands. The Acute/D4 Twin is another high-performance option, capable of producing 1200 Ws when paired with two generators or up to 9600 Ws with two Profoto D4 4800 units. It comes with multiple lamps, lights, and a split, 4m (13ft) lamp cable. Profoto's product lineup includes Softboxes in various sizes, the Pro-B2 and Pro-7b flash heads, and a range of accessories like diffusers and reflectors. The company also offers high-quality modeling lights with up to 250 W continuous power. Key features of Profoto products include: * High-powered flashes with recycling times as short as 0.09 seconds * Flexible light shaping options with zoomable tools * Portability and affordability without sacrificing performance * High-quality modeling lights with precise control * Wide range of accessories available Profoto's commitment to design is evident in both its exterior and interior electronics, making it a crucial aspect of their products. Since the 1960s, Profoto has prioritized attention to detail, ensuring that every element serves a purpose. * * * * * Simplicity and Durability Profoto's design principle is rooted in simplicity, which complements durability. The metal-and-rubber clasp on Light Shaping Tools demonstrates this approach, as it provides an intuitive understanding of its function without unnecessary complexity. * * * * * Intuitive User Experience The equipment offers feedback through multiple senses: visual, tactile, and auditory cues. This ensures that users can quickly identify settings and make adjustments in high-pressure environments. * * * * * Durable Lamp Outlets Profoto's lamp outlets combine ease of use with extreme durability and safety. The connection and locking mechanism requires minimal force, making it secure yet accessible. * * * * * Ergonomic Handles for Secure Handling Rubber handles on top of generators provide a secure grip, even when hands are sweaty or dirty, minimizing the risk of accidents. * * * * * Digital Wireless Freedom Profoto's digital wireless freedom system offers professional photographers advanced triggering capabilities with simplified interfaces. This technology eliminates the need for PC sync cables and provides full 32 channel/4 zone control. With a 100m effective range, the digital radio system can withstand interference from other strobes and lighting conditions, ensuring reliable flashes every time. The system operates on radio frequency, allowing it to work around corners and through walls. The Pro-B2 offers various features such as precision delay, rear curtain sync, and multi-pops, making it ideal for professional applications. It is fully compatible with 32 channels used by Pocket Wizard transmitters or transceivers, and can also be used with the Sekonic L-358, L-608, or L-558 light meters. The Pro-B2 is available in two versions: one for Europe (433 Mhz) and another for other markets (344 Mhz). It comes with a snap-on universal power adapter, allowing it to be used as a regular studio generator. The charger can fully recharge the battery in 5 hours using the Charger 1A, or twice as fast with the Charger 2A. The Pro-B2 kit bag provides rugged protection for the generator and lamp head, while the Pro-7b offers a smaller but still powerful battery pack suitable for travel or lighter applications. The Profoto Pro-B2 is the world's fastest battery generator, offering an 8 f-stop range, a 250 W modeling light, and recycling in as little as 0.04-1.8 seconds. The Profoto Pro-7b is the preferred option for those seeking portable and budget-friendly studio quality lighting. This portable light source offers a powerful 1200 Ws of output, with flashes lasting up to 250 times per battery. The battery features fast recycling times, ranging from 0.09 to 2.8 seconds, and can be partially charged without penalty. Additional cassettes allow for rapid replacement in case of low power.
